

“ simple solutions to complex communications ...”

Argent Terminal Adaptor Support Package

The Argent Terminal Adaptor (ATA) is a tool that offers merchants much more than just a EFT solution. The ATA enables you to integrate and enhance your entire communications including connecting a Local Area Network to the ATA, faster Internet connection speeds, supports multiple telephony equipment, connect multiple branch sites with head office for downloading daily takings, inventory control, price changes and more.

Braintree Communications designed and developed the ATA you currently use to access Telstra's Argent ISDN network. If you have any questions about what you can connect to your ATA then why not ask the experts.

How can the ATA enhance MY network?

How do I access the Internet through the ATA?

Can I connect my branch sites to head office with the ATA?

Braintree offers merchants **personalised** data communications support excluding telephone and EFT. Braintree offers you peace of mind knowing that someone is available to answer all your data communications questions when you need it most.

Braintree's support package offers merchants:

- 1800 freecall No. for qualified technical support (9-5 Mon-Fri E.S.T.),
- 24x7 Email support,
- Discounted desktop applications,
- Access to a member website which provides value-added information on how to get the most from your ATA, configuration scenarios, FAQs and more.

Desktop applications are useful PC based tools that will assist you to manage and monitor your communications environment. Applications under development include an outgoing call monitoring application and WAN tool that schedules data transfers between branch stores and head office.

Fill out the form on the back and fax it to **07 3255 1885** to subscribe.

If you prefer to enter a customised support contract email us at sales@braintree.com.au.
